

1. Name of Project: WORLD WE LIVE IN

2. Brief one-sentence description of project:

WWLI is a discussing project for those interested in reflecting on how we interact with each other and environment and to what extend the Internet and computer technologies help us in it.

3. Full description of project:

What are the ways we comprehend and influence the world? How do we interact with each other? How computer and the Internet projects help us to make this interaction more effective? What are advantages and difficulties of online collaboration in the world we live in? In the ongoing discussion, we welcome your ideas and thoughts in form of essays, images and short clips to be shared via the projects mailing list.

This year's discussion can help students to get a clearer idea about education forms and tools in the XXI century.
